

Finalist selects Jaspersoft Professional Edition to deliver in complex reporting environments

With a client that required a robust, scalable reporting solution that could deliver in a complex environment, Finalist set about evaluating open source reporting tools. After a thorough examination of the market, Finalist selected Jaspersoft's Professional Edition as a result of its maturity and rich feature set. During the software deployment, Finalist found Jaspersoft to be easy-to-use but also, most importantly, extremely flexible and maintainable.

Background

Finalist is an open source business and technology service company providing business consulting, systems integration and outsourcing to clients in education, healthcare industry, government and non-profit organisations throughout the Netherlands. Headquartered in Rotterdam, the company has offices in Amsterdam and Eindhoven.

One of Finalist's clients, Netwerk VSP BV, is the leading direct marketing and distribution organisation within the Netherlands. Delivering over six billion items a year, its core business is to manage the complex logistics to enable its clients to communicate effectively with their target audiences.

Challenge

Netwerk VSP has a large database system containing lifestyle, demographic and socio-demographic data which it uses to help its wide range of clients pinpoint their target markets. This is then supported by its effective door-to-door service. Understandably, with many customers and many orders this leads to a mass of data that needs to be accessed and reported on efficiently to take full advantage of the information available.

Producing around 200 different reports daily, Netwerk VSP decided that it needed a standardised reporting solution to access existing reports and one that could be readily extended to meet the changing needs of its clients. Netwerk VSP then challenged Finalist to suggest a future-proof, easy-to-use and maintain solution.

SOLUTION

Jaspersoft Professional Edition

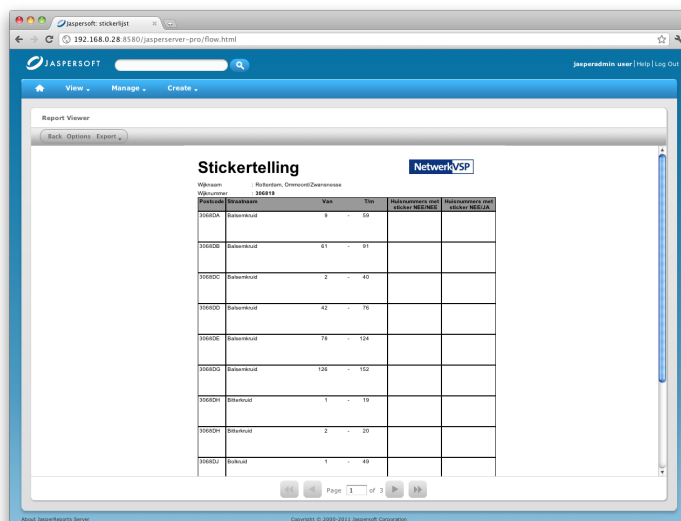

RESULTS

Readily maintainable and extensible reporting solution for a complex environment

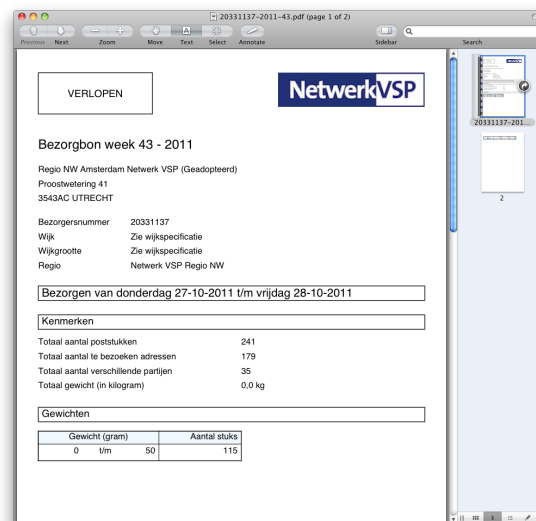

Benefits

Due for completion by the beginning of 2012, the solution uses Jaspersoft’s reporting software interacting with a huge and complex Oracle database. Verlaat says that the integration of Jaspersoft with the database and the delivery of the reporting system has been a ‘straightforward’ task with very few issues.

“The biggest benefit of the Jaspersoft reporting solution is in its maintainability,” says Van ‘t Verlaat. “It is very easy to plug-in new reports and to restyle system reports.”

Future

Finalist aims to grow whilst remaining the best independent, open source systems integrator in the Netherlands. “We aim to make the best choices for our clients and will only deliver the right solutions for them regardless of the product. Currently, the right reporting tool within the open source landscape is, without doubt, Jaspersoft. We are seeing a growing demand for reporting solutions within complex client environments and I anticipate recommending Jaspersoft to them,” concludes Van ‘t Verlaat.

About Finalist

Finalist has been supporting and assisting organisations with ICT consultancy, implementation projects and application management since 1988. The company specialises in open source, open standards and the programming languages Java, PHP and Ruby. Finalist creates understanding, insight and transparency between organisations and their stakeholders. Finalist's ICT products and services also enable more intensive collaboration between organisations. The company does this through the use of three specialisms: Enterprise Content Management, Data Visualisation and Integration & Development. Thanks to its wide experience and passion for software development, Finalist is familiar with the latest technologies that can be speedily and carefully utilised with a clear vision. In the Netherlands Finalist employs sixty staff at its Rotterdam, Amsterdam and Eindhoven offices. For more information see www.finalist.nl

About Jaspersoft Corporation

Jaspersoft provides the most flexible, cost effective and widely deployed Business Intelligence suite in the world, enabling better decision making through highly interactive, web-based reports, dashboards and analysis. Leveraging a commercial open source business model, Jaspersoft provides end-to-end BI capabilities at a fraction of the cost of other vendors. The BI suite includes pixel-perfect enterprise reporting, ad hoc query, dashboards, OLAP and in-memory analysis, and data integration. Jaspersoft is the only BI vendor that enables companies to adapt to the new, virtualized world by providing a complete spectrum of on-premise, multi-tenant SaaS and cloud-based deployment options for both embedded and standalone business intelligence. Unlike traditional BI vendors, Jaspersoft is built on a modern, lightweight, standards-based architecture and offers greater vendor independence thanks to its open source codebase. Unlike niche BI vendors, Jaspersoft represents a safe choice with tens of thousands of production deployments across a wide range of industries.

Jaspersoft's open source business intelligence software has more than 14 million product downloads worldwide, 175,000 production deployments and over 14,000 commercial customers in 100 countries. Its BI suite is advanced regularly by a development community of more than 230,000 registered members. For more information visit: <http://www.jaspersoft.com> and <http://www.jasperforge.org>.
